

I hope you are not seriously considering limiting subscription broadcasting in a consumer market. I urge you to reject the National Association of Broadcaster's petition 04-160. I do not see any point in limiting traffic and weather from a service that I am willing to pay for.

To me, the NAB's reasoning of prohibiting satellite radio "from using any technology to permit the delivery of content that would be aired on a receiver in one location that differs from the content that would be aired on a receiver in a different location; and 2) prohibit SDARS providers from providing locally oriented services on nationally distributed channels" is already a moot point considering other channel broadcasts such as the Weather Channel on Satellite TV.

Thank you for your time.

Terry Speicher
